SUPERFUND PROGRAM MANAGEMENT BRANCH

Dear Ms. Adams:

Re: Request for Information Pursuant to Section 104(e) of CERCLA for the Stickney Avenue Landfill and Tyler Street Dump Sites in Toledo, Ohio

Enclosed in accordance with Chief Thomas W. Mateer's August 12, 1993 letter is the Response of The Toledo Edison Company to the referenced Request for Information.

Please direct any future correspondence or inquiry on this matter to myself or to Mary O'Reilly as counsel for The Toledo Edison Company.

Yours very truly,

William J. Kerner Principal Counsel

WJK:pb

Enclosure

# RESPONSE OF THE TOLEDO EDISON COMPANY TO THE REQUEST FOR INFORMATION FOR THE STICKNEY AVENUE LANDFILL AND THE TYLER STREET DUMP SITE LOCATED IN TOLEDO, OHIO

#### **GENERAL OBJECTIONS**

- 1. The Toledo Edison Company is a defendant in a pending civil action captioned <a href="City of Toledo v. Allied-Signal">City of Toledo v. Allied-Signal</a>, Inc., et al., Case No. 3:90 CV 7140 (N.D. Ohio) involving the Dura Avenue Landfill in Toledo, Ohio, and therefore objects to the Information Requests to the extent such requests seek information protected under the authority of 28 U.S.C. §2072, and other statutory and common law by the attorney-client or attorney work-product privileges.
- 2. The Toledo Edison Company is a defendant in a pending civil action captioned <u>City of Toledo v. Allied-Signal, Inc., et al.</u>, Case No. 3:90 CV 7140 (N.D. Ohio) involving the Dura Avenue Landfill in Toledo, Ohio, and therefore objects to the Information Requests to the extent such requests conflict with the privileges and protections granted to The Toledo Edison Company under the rules established pursuant to 28 U.S.C. §2072.
- 3. The Toledo Edison Company objects to Instruction No. 3 on the basis that CERCLA does not mandate that a response "identify all contributing sources of information", nor is it at all clear what this phrase in the instructions means. Additionally, The Toledo Edison Company is not

producing any material which is subject to the attorney-client privilege or other privilege, or which constitutes protected attorney-work product, or which is not otherwise discoverable.

- 4. The Toledo Edison Company objects to any attempt by EPA to create through Instruction No. 4 a continuing duty for The Toledo Edison Company to supplement its response on the ground that such instruction exceeds the statutory authority of CERCLA. Without waiving its objection, however, if The Toledo Edison Company becomes aware of any information that demonstrates its response was incorrect when made, though believed to be correct when made, or is no longer true, then The Toledo Edison Company will voluntarily supplement its response.
- that it is unduly burdensome and overbroad by seeking to require responses based upon "all information and documents" in the "possession, custody or control" of "former or current employees, agents, servants, contractors or attorneys." The Toledo Edison Company further objects to Instruction No. 6 for the reason that CERCLA §104(e) does not require The Toledo Edison Company to furnish EPA with information outside of its control, as would be the case with former employees and contractors.
- 6. The Toledo Edison Company objects to Instruction No. 7 to the extent that the words "may have" concerning knowledge of operations, hazardous substance use, storage, treatment, releases, spills, disposal or handling practices calls for guessing or speculative responses. Additionally, the letter's instructions exceed the scope of the statute. CERCLA does not

require that The Toledo Edison Company certify or notarize the answers to the Information Request. Without waiving its objections, The Toledo Edison Company states that it has conducted a review of relevant corporate records and has performed a reasonable inquiry of employees knowledgeable of the matters raised in the Information Request regarding the Site.

- 7. The Toledo Edison Company objects to Definition No. 1 on the basis that "you" and "Respondent" are defined to include contractors, trustees and agents, which is beyond the scope of inquiry set out in CERCLA. Section 104(e) of CERCLA does not require The Toledo Edison Company to furnish EPA with information outside of its control.
- 8. The Toledo Edison Company objects to Definition No. 4 to the extent that it expands the definition of "hazardous substance" contained in CERCLA by including petroleum products. However, without waiving its objection, The Toledo Edison Company will employ this definition in the formulation of its responses.

#### **INFORMATION REQUEST 1:**

Identify all persons consulted in the preparation of the answers to these Information Requests.

#### Response 1:

The Toledo Edison Company states that in the investigation conducted by Wilbur L. Headen, Corporate Security Agent of Centerior Service Company, 55 Public Square, Cleveland, Ohio 44101, the following current and former employees and other persons were consulted in the preparation of these Information Requests:

Dennis Asman, 6525 Hagman Road, Toledo, Ohio Thomas Barounis, USEPA, 77 West Jackson Boulevard, Chicago, Illinois Gary Beren, Edelstein & Sons, 1370 LaGrange Avenue, Toledo, Ohio John Bohnsack, 4232 Blackthorn, Toledo, Ohio Leland Bradley, 6200 Oak Tree Boulevard, Independence, Ohio Kenneth Brancheau, 2920 Isha Laye Drive, Toledo, Ohio Billy Coker, 1642 Crestwood Avenue, Toledo, Ohio Matthew Collins, Acme Station, 1401 Front Street, Toledo, Ohio Richard Crouse, 240 Twin Creeks Drive, Chagrin Falls, Ohio Reginald Crowell, 6016 Sylvan Green, Sylvania, Ohio Sherri Estes, USEPA, 77 West Jackson Boulevard, Chicago, Illinois Wesley Ewing, 5665 Firethorne Drive, Toledo, Ohio Wendell Johnson, 2705 Pine Knoll, Toledo, Ohio Drew Koet, 6233 Hagman Road, Toledo, Ohio Richard May, 3729 Dewlawn Drive, Toledo, Ohio Ralph McBee, 2250 Densmond Drive, Toledo, Ohio Leonard Merritt, 104 Dickens Street, Toledo, Ohio Richard Mohler, 4827 Brott Road, Toledo, Ohio Joseph Murphy, 6844 Carrietowne Lane, Toledo, Ohio

Michael R. Myers, Acme Station, 1401 Front Street, Toledo, Ohio Kenneth A. Peffer, 4640 Hinckley Industrial Parkway, Cleveland, Ohio Robert L. Perry, 3854 Dikway Street, Toledo, Ohio Robert R. Perry, 6200 Oak Tree Boulevard, Independence, Ohio Robert Rodi, 1001 W. Delaware Avenue, Toledo, Ohio

#### **INFORMATION REQUEST 2:**

Identify all documents consulted, examined, or referral (sic) to in the preparation of the answers to these Requests and provide copies of all such documents.

#### Response 2:

The Toledo Edison Company is a defendant in a pending civil action captioned City of Toledo v. Allied-Signal, Inc., et al., Case No. 3:90 CV 7140 (N.D. Ohio) involving the Dura Avenue Landfill in Toledo, and therefore objects to Information Request 2 to the extent it seeks information protected by the attorney work-product or attorney client privileges, which privileges are established pursuant to 28 U.S.C. §2072 and other statutory and common law. The Toledo Edison Company further objects to Information Request 2 to the extent such request conflicts with the privileges and protections granted to The Toledo Edison Company under the rules established pursuant to 28 U.S.C. §2072. Documents protected by the attorney work-product and attorney client privileges are maintained by joint defense counsel at the law office of Fuller & Henry, 17th Floor, One Seagate, Toledo, Ohio.

Without waiving the foregoing objections, Respondent utilized and herewith provides the following documents:

Memorandum from Kenneth A. Peffer, Records Management Coordinator/CRC, dated 8-27-93, see Attachment I; and Toledo Edison Company Records Retention Schedule, dated 3-1-84, see Attachment II.

#### **INFORMATION REQUEST 3:**

If you have reason to believe that there may be persons able to provide a more detailed or complete response to any Information Requests or who may be able to provide additional responsive documents, identify such persons.

#### Response 3:

The Toledo Edison Company's investigation as conducted by Wilbur L. Headen did not disclose information which gave reason to believe that there may be other persons who might be able to provide a more detailed or complete response to any Information Request or who may be able to provide additional responsive documents relative to the Information Request.

#### **INFORMATION REQUEST 4:**

List the EPA Identification Numbers of the Respondent.

#### Response 4:

The Toledo Edison Company's currently existing facilities - none of which are known to have disposed of hazardous wastes or substances at the Stickney

Avenue and Tyler Road Sites - are as follows:

LOCATION	RCRA I.D. NUMBERS
ACME GENERATING STATION	OHD000821371
BAY SHORE GENERATING STATION	OHD000821389
DAVIS-BESSE NUCLEAR POWER STATION	OHD000720508
DEFIANCE SERVICE CENTER	OHD000720482
DELAWARE SERVICE CENTER	OHD020286118
HOLLAND OPERATIONS CENTER	OHD000270516
LAKEWOOD OPERATIONS CENTER	OHD000821363
LINDSEY SERVICE CENTER	ОНD000720490
TOLEDO EDISON PLAZA	OHD000821355
WAUSEON SERVICE CENTER	OHD000720474

#### **INFORMATION REQUEST 5:**

Identify the acts or omissions of any person, other than your employees, contractors, or agents, that may have caused the release or threat of release of hazardous substances, pollutants, or contaminants, and damages resulting therefrom.

#### Response 5:

The Toledo Edison Company objects to this request on the grounds that it is overbroad and not related to the Site at issue. However, without waiving the foregoing objection, but assuming that this request is intended to be related to the Site at issue, The Toledo Edison Company objects to this request to the extent it is intended or may be construed by any person or entity to be an admission that acts or omissions of Toledo Edison's employees, contractors, or agents caused a release or threat of release of hazardous substances, pollutants or contaminants at the Site. However, should it be determined by a judicial or similar body that agents, contractors or employees of The Toledo Edison Company caused or contributed to a release or threat of release of hazardous substances, contaminants or pollutants at the Site, nothing in this response is intended or shall be construed as a waiver of any rights of contribution, indemnification or other recovery that may exist at law or in equity against such agent, contractor or employee.

Without waiving the foregoing objections, The Toledo Edison Company states that its investigation as conducted by Wilbur L. Headen disclosed no information or records identifying any such other acts or omissions.

#### **INFORMATION REQUEST 6:**

Identify all persons having knowledge or information about the generation, transportation, treatment, disposal or other handling of material at the Site.

#### Response 6:

The Toledo Edison Company states that in the investigation conducted by Wilbur L. Headen only one person was identified as having knowledge or information about the generation, transportation, or disposal of material at the Site, as follows:

On August 31, 1993, Richard Mohler, 4827 Brott Road, Toledo, Ohio, advised that he worked for Toledo Edison for approximately 38 years from 1946 to 1989. He retired as a Foreman of the Underground Department at Delaware Service Center. He remembers dumping construction material such as stone, concrete, dirt and lumber at both the Stickney Avenue Landfill and Tyler Street Dump Site and the Dura Avenue Landfill.

Mohler worked as a truck driver in the Underground Department at Delaware Service Center, where he was one of about seven or eight drivers. Company trucks hauled the construction material to these sites almost on a daily basis. Mohler never transported or knew of any employee delivering contaminated or hazardous materials or waste to any dump sites. These dumps were operated by the City and everybody in the area dumped at these sites.

Mohler was not sure who made the arrangements to dispose of materials at the dump site locations.

#### **INFORMATION REQUEST 7:**

Identify all persons, including yourself, who may have arranged for disposal or treatment or arranged for transportation for disposal or treatment of waste materials, including hazardous substances, at the Site. In addition, identify the following:

- The persons with whom you or such other persons made such arrangements;
- b) Every date on which such arrangements took place;
- c) For each transaction, the nature or the waste material or hazardous substance, including the chemical content, characteristics, physical state (e.g., solid, liquid), and the process for which the substance was used or the process which generated the substance;
- d) The owner of the waste materials or hazardous substances as accepted or transported;
- e) The quantity of the waste materials or hazardous substances involved (weight or volume) in each transaction and the total quantity for all transactions;
- f) All tests, analyses, and analytical results concerning the waste materials;

- g) The person(s) who selected the Site as the place to which the waste materials or hazardous substances were to be transported;
- h) The amount paid in connection with each transaction, the method of payment, and the identity of the person from whom payment was received;
- i) Where the person identified in g) above intended to have such hazardous substances or waste materials transported and all evidence of this intent;
- j) Whether the waste materials or hazardous substances involved in each transaction were trans-shipped through, or were stored or held at, any intermediate site prior to final treatment or disposal;
- k) What was actually done to the waste materials or hazardous substances once they were brought to the Site;
- The final disposition of each of the waste materials or hazardous substances involved in such transactions;
- m) The measures taken by you to determine the actual methods, means, and site of treatment or disposal of the waste material and hazardous substance involved in eachtransaction.

- n) The type and number of containers in which the waste materials or hazardous substances were contained when they were accepted for transport, and subsequently until they were deposited at the Site, and all markings on such containers;
- o) The price paid for (i) transport (ii) disposal or (iii) both of each waste material and hazardous substance.
- p) All documents containing information responsive to a o above or in lieu of identification of all relevant documents, provide copies of all such documents.
- q) All persons with knowledge, information, or documents responsive to
   a p above.

#### Response 7:

The Toledo Edison Company states that its investigation as conducted by Wilbur L. Headen did not identify any persons who may have arranged for the disposal or treatment or arranged for transportation for disposal or treatment of waste materials, including hazardous substances, at the Site other than the information on the construction type wastes disposed of at the Site as noted in Response 6.

#### **INFORMATION REQUEST 8:**

If your waste was not taken to the Stickney Avenue Landfill Site or the Tyler Street Dump Site during the period from 1951 to 1981, where were your wastes taken and how were they disposed.

#### Response 8:

The Toledo Edison Company objects to this Information Request to the extent it seeks a response as to other waste sites which bear no relation to the Site at issue. Without waiving the foregoing objection, The Toledo Edison Company states that in addition to the wastes identified in Response 6 as having been taken to the Stickney Avenue Landfill and Tyler Street Dump Site and the Dura Avenue Landfill, the investigation as conducted by Wilbur L. Headen disclosed information regarding where other Toledo Edison Company wastes were taken and how they were disposed, as follows:

On August 30, 1993, Robert Rodi, General Manager of Toledo Operations/
TOL1842, advised that he has been General Manager of Holland and Delaware
Service Centers since 1980. Lakewood Service Center became his responsibility
in 1984. Rodi was not aware of the Stickney Landfill or the Tyler Avenue Dump
Site, but he remembers the Dura Landfill and that Stickney may be near Dura.
Rodi believes waste might have gone to Dura from some of Toledo Edison's
facilities, but he does not know what was disposed of at Dura. Rodi seemed to
remember a landfill known as Evergreen located in Northwood, Ohio, where
wooden poles were disposed of.

The poles were transported by either BFI or Waste Management, whichever was the successful bidder for the contract that was bid on from year to year.

On August 31, 1993, Leonard Merritt, 104 Dickens Street, Toledo Ohio, advised that he never heard of the Stickney Avenue Landfill or the Tyler Street Dump Site. He retired from Toledo Edison after 32 years of service from 1947 to 1989. He worked at Delaware Service Center in Construction Underground and the Transformer Shop and his last work assignment was Superintendent of Construction Underground.

Merritt remembers dumping at Dura Landfill and at another dump site near the Acme Station but he does not remember what the dump site was called.

Both Dura and the other dump site were owned by the City and were used by everyone. Nothing hazardous or contaminated was disposed of at these sites by Toledo Edison; just ordinary trash like paper and wood.

On August 31, 1993, Robert L. Perry, 3854 Dikway Street, Toledo, Ohio, advised that he is not familiar with the Stickney Avenue Landfill and Tyler Street Dump Site. He does remember a site on the east side of Toledo, but cannot recall its name, and Dura. Dirt, wood, paper and concrete were dumped; nothing of a hazardous or contaminated nature.

He was foreman in the Underground Department at Delaware Service Center before retiring. He retired after 37 years of service from 1946 to 1983.

On 9-1-93, Billy Coker, 1642 Crestwood Avenue, Toledo, Ohio, advised that he was employed at Toledo Edison for 34 years from 1950 to 1984. The last 13 years he was a Foreman in the Transformer Shop. No transformers went to any dump sites from Toledo Edison. He has no recollection of Stickney Avenue Landfill or Tyler Street Dump Site.

Used oil was given away to someone in Michigan and he believes Edelstein Company bought transformers and capacitors. He believes that persons who might have had more pertinent information have passed away.

On 9-1-93, Wesley Ewing, 5665 Firethorne Drive, Toledo, Ohio, advised he was employed at Toledo Edison from 1945 to 1982. During the later years he was Foreman of Underground at Delaware and Holland Service Center. He remembers dumping wood, concrete and dirt at a city dump located on Central Avenue.

On 9-2-93, Richard Crouse, recently retired Vice President of Centerior Fossil Operations, 240 Twin Creeks Drive, Chagrin Falls, Ohio, advised he has never heard of the Stickney Avenue Landfill or the Tyler Street Dump Site. During his years with Toledo Edison he worked at the generating plants. He has heard of Dura and Evergreen but cannot provide any details about them.

He advised the plants never transported anything to dump sites, and that contract companies were used.

James Bohnsack, 4232 Blackthorn, Toledo, Ohio, advised he was employed at Toledo Edison for 32 years from 1958 to 1990. He worked at both the Acme and Bay Shore Stations. He has never heard of Stickney or Tyler Dump Site. The plants used contractors BFI or Waste Management to haul plant trash. Bohnsack has heard of Dura and Evergreen Landfill but knows nothing about them.

On 9-7-93, Wendell Johnson, retired President of Toledo Edison, 2705 Pine Knoll, Toledo, Ohio, advised he worked at Delaware Service Center during the mid-1960's in the Transformer Department. He has never heard of the Stickney Avenue Landfill or the Tyler Street Dump. Waste oil from the transformers was given to some oil company. He does not remember the name. Transformers went to A. Edelstein & Sons. Johnson could not recall any landfill sites.

On 9-8-93, Richard May, 3729 Dewlawn Drive, Toledo, Ohio, advised that he retired from Toledo Edison in 1987 after 38 years of service. He was Plant Construction Superintendent. May worked at all of the facilities in the Metropolitan Toledo Area. He worked between 8 to 14 years in Distribution and Substations. He remembers giving waste oil to a company during the early 1950's but does not remember the name of the company. May has never heard of Tyler Street Dump Site, but has heard of Stickney Avenue Landfill. He was not involved in disposing waste at this site and has no pertinent information.

On 9-10-93, Leland Bradley, Accountant/CSC, 6200 Oak Tree Boulevard,

Independence, Ohio, advised that there may be some records available

indicating that BFI and Waste Management did some sort of business with Toledo

Edison, but it is not known if any records mention Evergreen Landfill. Toledo

did not file invoices by name but by check number. He stated that if necessary, records could be researched, but that this activity would be very tedious and time consuming.

On 9-13-93, Dennis Asman, Sales Manager for Waste Management, 6525 Hagman Road, Toledo, Ohio, advised his company never dumped any materials picked up at Toledo Edison area facilities at the Stickney Avenue Landfill or Tyler Street Dump Site or any other municipal dump sites in Toledo. Waste Management has its own private dump site. Nothing hazardous or contaminated was obtained from Toledo Edison. Waste Management went public in 1972. Asman was not sure when they began doing business with Toledo Edison. Asman has no idea if any records exist showing business transactions with Toledo Edison.

On 9-13-93, Gary Beren, Owner of A. Edelstein & Sons, 1370 LaGrange Avenue, Toledo, Ohio, advised this company has been doing business with Toledo Edison since 1938. He remembers the Stickney Avenue Landfill and the Tyler Street Dump Site. Edlestein never dumped any material from Toledo Edison at these sites.

His company bought transformers and capacitors from Toledo Edison and they were recycled, not disposed of. The only records available are in Beren's head. He says during 1951 records were disposed of after five or six years. Beren believes most of the people he did business with are deceased.

On 9-14-93, Drew Koet, Special Waste Manager for Browning Ferris Industries (BFI), 6233 Hagman Road, Toledo, Ohio, advised that he has no knowledge of the Stickney Avenue Landfill or the Tyler Street Dump Site. He began his employment with this company in 1983. He believes that this company came into existence sometime in 1972 and began doing contract service for Toledo shortly afterwards. BFI has its own dump site and would not have used any municipal dumps in Toledo. To the best of his knowledge no records exist indicating any business transactions with Toledo Edison during the time periods indicated to him.

On 9-15-93, Michael R. Myers, Security Supervisor/Investigator for TE, TOL1922, advised that the Evergreen Landfill is located in Northwood, Ohio. The dump site near Acme Station was called Consaul and Wheeling Dump and was owned and operated by the City of Toledo. A trailer park occupies the space where this dump site was located. The trailer park has been around for approximately 20 years. East side and Central Avenue dump sites are not known.

Respectfully submitted,

THE TOLEDO EDISON COMPANY

Now comes Thomas H. Kirk, Manager of Corporate Security of Centerior Service Company, which like The Toledo Edison Company is a wholly-owned subsidiary of Centerior Energy Corporation, who first being duly sworn, states that he is Manager of Corporate Security for Centerior Service Company, that upon request of legal counsel he has read the Request for Information for the Stickney Avenue Landfill and the Tyler Street Dump Site issued to The Toledo Edison Company and has directed his Security personnel to conduct a diligent record search and a diligent interviewing process with present and former employees who may have knowledge responsive to such Request for Information, and that to the best of his information and belief such record search and interviewing process has been completed.

Thomas H. Kuh

Sworn to and subscribed before me this 174 day of September, 1993.

From: K. A. Peffer Date: August 27, 1993

Phone: 43792 Mailstop: CRC

Subject: USEPA CERCLA Section 104(e)
Request for Information for
the Stickney Avenue Landfill
and Tyler Street Dump Sites,

1951 through 1981

No information was found regarding the Stickney Avenue Landfill or Tyler Street Dump Sites in response to your inquiry, although records searches were conducted as follows:

#### Toledo Purchase Order File (on microfilm)

No reference to either the Stickney Avenue Landfill or Tyler Street Dump Sites. Retention schedule for purchase orders was six years prior to 1979; therefore, no purchase order file exists prior to that date except those kept by Davis-Besse construction.

### Check Packages (Vouchers, Invoices & Supporting Documents)

Voucher Index Registers (1967-1979) are on microfilm. No checks were written to either the Stickney Avenue Landfill or Tyler Street Dump Sites during that time period. No registers prior to 1967 were found which coincides with the twenty-five year retention period.

Records storage box #24549 (D-35-I) contains registers for 1980-1985. No references to the Stickney Avenue Landfill or the Tyler Street Dump Sites were found.

I spoke to Wayne Williamson, Facilities Services Supervisor in Toledo, regarding this matter, but he had no knowledge of the Stickney Avenue Landfill or Tyler Street Dump Sites and was not aware of anyone who might have information relative to this search.

Questions related to hazardous materials, tax returns, financial statements and by-laws should be referred to specific departments.

To my knowledge, there are no documents referring to the Stickney Avenue Landfill or the Tyler Street Dump Sites in the records stored at the Corporate Records Center.

cc: E. A. Basta

### a Response 15:

Toledo Edison objects to this interrogatory because it seeks information which requires an opinion of an attorney and is protected by work product. In addition, it is overly broad, vague and ambiguous, seeks information not related to the Dura site and assumes facts which are neither established nor admitted. Specifically, this interrogatory assumes that Toledo Edison's operations involve the handling, use, generation, transportation or disposal of hazardous substances.

Without waiving its objection, Toledo Edison identifies the following persons with the following described information:

Harvey Clifton, retired Toledo Edison Underground Electrical Mechanic, remembers transporting asphalt, dirt, concrete and wood while working as a laborer at the West Delaware Service Center.

Thomas J. Kozak, retired Vice President of Operations, advised that Toledo Edison did use Dura, that he does not know any of the details and that most of the people who would have such knowledge are deceased.

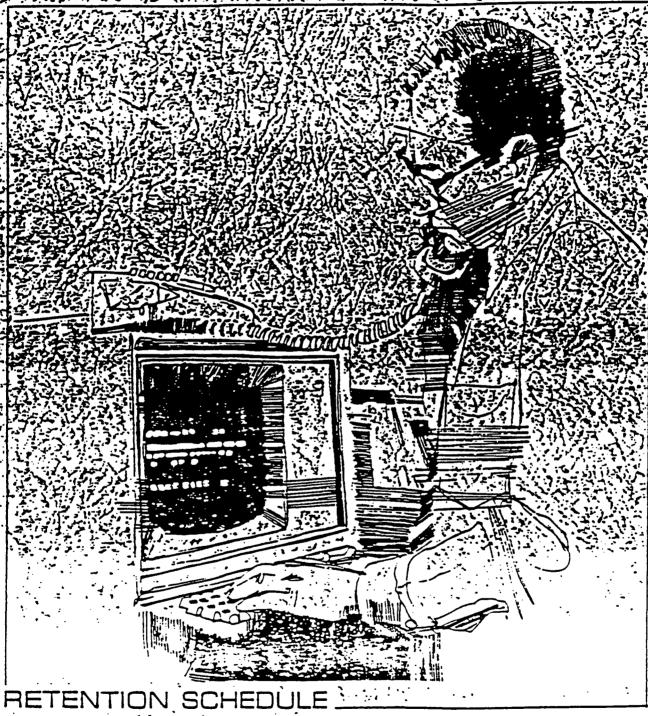

Leonard H. Merritt, retired Supervisor of Underground Lines, indicated his belief that Toledo Edison dumped concrete at Dura Avenue Landfill.

Joseph F. Pakalski, retired Underground Electrical Mechanic, advised he remembers cleaning an incinerator as a helper at Delaware Service Center, and hauling the ashes to Dura Avenue Landfill in Company trucks.

Oliver Pierce, retired equipment tester, indicated his belief that wood delivery crates from transformers were disposed of at Dura Avenue Landfill using Company trucks.

Charles W. Sasse, retired Underground Line Supervisor, indicated that he had no concrete information pertaining to Dura Avenue Landfill, but believes that sealed capacitors were disposed of at Dura Avenue Landfill.

Charles R. Whitney, retired Electrical Mechanic, indicated he dumped rocks, wood, and dirt for disposal at Dura Avenue Landfill.

## TOLEDO EDISON COMPANY RECORDS RETENTION SCHEDULE

COPY	NO.	

ISSUED TO

FERC 18CFR125 NRC 10CFR20 NRC 10CFR50 PUCO 4901:1-9-06

EFFECTIVE 3/1/84

## TOLEDO EDISON COMPANY RECORDS RETENTION SCHEDULE

The documents listed in the following retention schedule meet, or, in many instances, exceed the retentions established by the Federal Energy Regulatory Commission (FERC) and the Public Utilities Commission of Ohio (PUCO). The purpose of this schedule is to provide departments with a basic definition of their responsibility for records retention.

As a general rule, those documents referred to on a daily or weekly basis, whether the media be microfilm or hard copy, should be kept within individual departments as work tools. Any document requiring less frequent reference should be stored in the Records Centers and signed out on an as-needed basis.

The Company is committed to transferring as many documents (active and inactive) as possible to microfilm media. Questions or uncertainties regarding interpretation and application of records retention or microfilming procedures should be directed to the Records Services Supervisor.

Corporate Secretary

#### General Information

- 1. The regulations in this document do not excuse compliance with any other lawful requirement for preservation of records beyond the period prescribed herein.
- 2. Records not covered by these rules may be destroyed at option, provided they are not required for retention by other legislative authorities or used in lieu of records listed.
- 3. Unless otherwise specified, duplicate copies of records may be destroyed at any time, provided that the duplicate copies contain no significant information not shown in the original.
- 4. For the purpose of these regulations, the data constituting the records listed in the retention schedule may be retained in any of the media forms below, provided that the media selected has a standard life expectancy equal to or greater than the specified retention period.

<u>Media</u>	Expected Life
Paper & Card Stock	Archival Permanency
Magnetic Tape	5 years in controlled environment
Paper Tape	Archival Permanency
- Microfilm	Archival Permanency in controlled environment
Metallic Recording	Archival Permanency in controlled

Detailed regulations governing storage environment and conversion of media form may be referenced in FERC 18CFR125.

environment

5. Wherever the records, herein required for retention, are kept or stored, they shall be arranged, filed and currently indexed so that they may be readily identified and made available to representatives of the Commissions.

Data Strips

- 6. The destruction of records permitted to be destroyed may be performed in any manner. However, precautions should be taken to destroy the legibility of records when their content is forbidden by law to be disclosed to unauthorized persons.
- 7. When any records are destroyed before the expiration of the prescribed period of retention, a certified statement describing the extent and circumstances of premature destruction must be filed within ninety (90) days of discovery of the destruction.
